weaker cryptography algorithms when establishing security channel sessions.
For more information about this setting, see Knowledge Base article 942564 (http://go.microsoft.com/fwlink/?LinkId=104737).
A delegation for this DNS server cannot be created because the authoritative parent zone cannot be found or it does not run Windows DNS server. If you are integrating with an existing DNS infrastructure, you should manually create a delegation to this DNS server in the parent zone to ensure reliable name resolution from outside the domain "widgetllc.internal". Otherwise, no action is required.
Prerequisites Check Completed
All prerequisite checks passed successfully. Click 'Install' to begin installation.
If you click Install, the server automatically reboots at the end of the promotion operation.

Review your selections:
Create DNS Delegation: No
Database folder: C:\Windows\NTDS
Log file folder: C:\Windows\NTDS
SYSVOL folder: C:\Windows\SYSVOL
The DNS Server service will be configured on this computer.
This computer will be configured to use this DNS server as its preferred DNS server.
The password of the new domain Administrator will be the same as the password of the local Administrator of this computer.
These settings can be exported to a Windows PowerShell script to automate additional installations
